

AXIS LIGHT
8117

The modular light 8117 is an innovative solution for a huge range of applications. It allows infinite mounting compositions, providing creative design freedom for the most demanding audience. A single compact and elegant product that combines position, directional, and DRL, offering a homogeneous floating light and a wide illuminated area. It highlights the vehicle's design and enhances road safety through high visibility. With intense, vivid, and sharp illumination in all functions.

- Floating light
- Creative freedom
- Available in 3 or 4 modules

SUGGESTED APPLICATIONS
